— WELCOME

A yard you can walk into, not just a price list.

Al Madhi Carpentry cuts, nails and stacks every pallet it sells inside one yard in Al Sajaa, Sharjah — nothing is subcontracted out. This brochure walks through what we make, what each product is used for, and how an order runs from your first message to the truck leaving our gate.

Built where you can stand in it.

EST.
2003

Al Madhi Carpentry has been cutting, nailing and stacking wooden pallets out of the same yard in Al Sajaa Industrial Area, Sharjah, since 2003. Two production lines run out of that one yard — wooden pallets in every grade and size, and wood shavings off our own saws — and nothing is subcontracted to a third party. When you order from us, the people who quote the job are the people who build it and load the truck.

“We still measure every custom job on the bench ourselves. If a customer can name the size, we can build it — that hasn’t changed since 2003.”

OWNERSHIP — AL MADHI CARPENTRY, AL SAJAA

AL SAJAA INDUSTRIAL AREA

SHARJAH, UAE

— WHY BUY FROM THE FACTORY

The Al Sajaa standard

Six reasons customers order directly from the yard instead of a reseller.

01 Built to your size

Any size you need. Send a drawing, a photo, a sample pallet, or just the size of your carton.

02 Honest grading

If a used pallet will do the job we say so, instead of selling you a new one. Wet or rotten wood never reaches the saw.

03 Stock in the yard

Stock sizes are ready for same-day or next-day collection. Custom runs get a real completion date with the quote.

04 No middleman

Every pallet is cut, nailed and stacked here. If something is wrong you speak to the people who built it.

05 Fast production

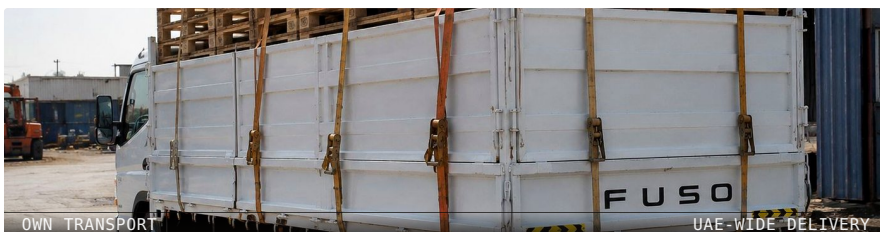

Quotes go out the same working day. Once you confirm, the order is on the floor that week — large runs included.

06 UAE-wide delivery

All seven emirates on our own transport. Collection from the yard is cheaper if you are running your own truck.

Come and see the yard

Open Monday–Saturday, 06:00–18:00. Bring a carton or a sample and we’ll measure it with you on the bench.

OWN TRANSPORT

UAE-WIDE DELIVERY

— TWO LINES, ONE YARD

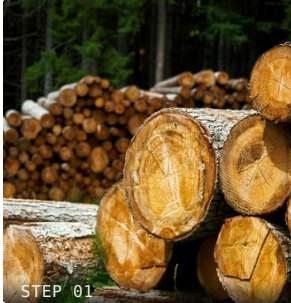

Wooden pallets and wood shavings both run out of Al Sajaa — see the full range on page 05, or the delivery map on page 17.

— HOW IT'S MADE

From timber to pallet.

4 STEPS
ONE YARD

Four steps, one yard — nothing here is subcontracted out.

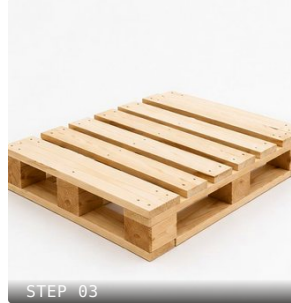

01 Raw timber

Every consignment is checked for moisture and rot before it is stacked — wet or warped stock never reaches the saw.

02 Cut & jointed

Boards are cut to spec and nailed to a fixed pattern per grade — heavy duty decks get the reinforced pattern without being asked.

03 Assembled

Runners, blocks and deck boards come together on the bench, checked against the sample before the batch is released.

04 Stacked & ready

Stock sizes wait in the yard for same or next-day collection; custom runs get a completion date with the quote.

— PLACING AN ORDER

You know the date before production starts.

Same working day

01

Send your specs

A drawing, a photo, a sample, or just the carton size.

02

We quote the same day

Priced against your measurement, same working day.

03

Production starts

Confirmed orders go on the floor that week.

04

Delivered to you

Own transport, all seven emirates covered.

— YARD TO YOUR GATE

Finished pallets go out on our own transport — Sharjah, Dubai and the rest of the UAE, all seven emirates covered. Running your own truck? Collection from the Al Sajaa yard costs less.

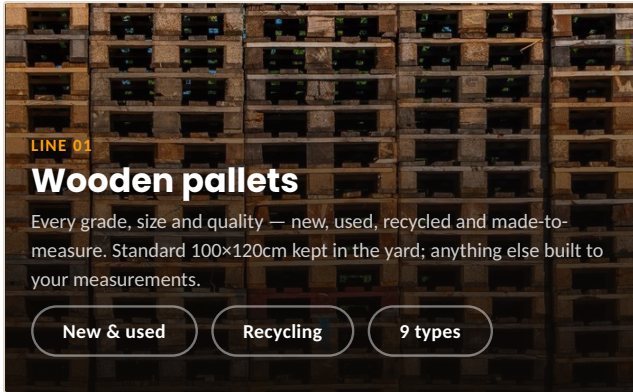

Standard sizes held in stock are usually ready the same or next day. Custom orders depend on quantity, and a completion date is given with the quote — large runs can be staged so part of the order ships early if you need it.

— THE FULL RANGE

Two lines, one yard.

EVERYTHING BUILT AT
AL SAJAA, SHARJAH

Everything on the next pages is made where you can come and stand in it.

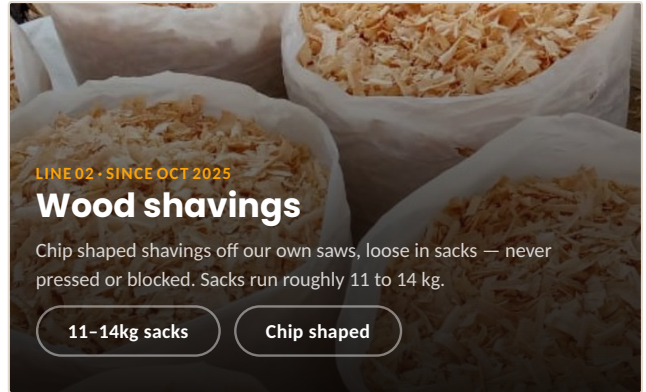

LINE 01

Wooden pallets

Every grade, size and quality — new, used, recycled and made-to-measure. Standard 100×120cm kept in the yard; anything else built to your measurements.

New & used Recycling 9 types

LINE 02 · SINCE OCT 2025

Wood shavings

Chip shaped shavings off our own saws, loose in sacks — never pressed or blocked. Sacks run roughly 11 to 14 kg.

11–14kg sacks Chip shaped

CAN'T SEE WHAT YOU NEED?

If it moves on a pallet, we build it.

This catalogue covers what leaves the yard most often — it is not a limit. Odd sizes, mixed grades, one-off crates and combined orders are all normal requests here. Call 050 597 4922 or email almadhicarpentry@yahoo.com and describe the load.

Built fresh, built to size.

PRODUCT
01 / 10

Cut and nailed from fresh timber in our own yard — light duty for retail and food cargo, heavy duty for steel and machinery, or a stock 100×120cm pallet ready to move today. Every consignment of wood is checked for moisture and rot before it reaches the saw.

Factory direct

ISPM-15 available

Same-day quote

Moisture checked

SPECIFICATION	DETAIL
SIZE	100 × 120cm standard, kept in stock. Any other size is built to your drawing or sample.
BUILD	Light & heavy duty — two board patterns depending on what the pallet carries.
MATERIAL	Fresh softwood pine, checked for moisture and rot before it reaches the saw.
CUSTOM BUILD	Any size — send a drawing, a photo, or the pallet you use now.
AVAILABILITY	Stock sizes ship same or next day. Custom runs get a completion date.
TREATMENT	ISPM-15 heat treatment available on request for export shipments.

NEW PALLET

STACKED & READY

— CHOOSE YOUR BUILD

OPTION 01

Light duty

The economical build. Light enough to move by hand — suits food and beverage, retail and pharma work where the load is not extreme.

OPTION 02

Heavy duty

Thicker boards and extra nailing where the weight sits, for steel, chemicals and heavy manufacturing. See page 07 for the full detail.

OPTION 03

Standard stock size

100×120cm kept in the yard for urgent orders. Need a different size? See custom sized pallets, page 09.

— WORTH KNOWING

Q — What wood do you use?

Softwood pine sourced and checked before it reaches the saw. Wet or warped stock is rejected before it is stacked.

Q — Can you heat treat for export?

Yes, ISPM-15 heat treatment is available on request. Tell us the destination country when you order and we will confirm the stamp and certificate.

Q — Is there a minimum order?

No fixed minimum. Small orders are accepted, and the price per pallet improves with quantity.

Reinforced for the heaviest loads.

Thicker deck boards, extra fasteners at the load points and a reinforced block pattern — built for steel, chemicals and heavy manufacturing where a standard pallet flexes or fails. We do not publish a fixed capacity chart; tell us the weight and what it is carrying and we spec the board count to suit.

Built for steel

Chemicals

Machinery

REINFORCED BUILD

HEAVY DUTY

— WHERE THE STRENGTH COMES FROM

01

Thicker deck boards

Upgraded board thickness across the top deck so it does not bow under a concentrated load.

02

Extra fasteners

More nails exactly where the weight sits, not spread evenly — the points that actually see the stress.

03

Reinforced blocks

Denser block pattern underneath so the base does not crush under a forklift or racking point load.

— HOW WE QUOTE IT

Tell us the load, we spec the build.

There is no single “heavy duty” spec — a drum of chemicals and a steel coil load a pallet completely differently. Give us the weight, whether it is a point load or spread evenly, and whether it moves by forklift or crane, and we will tell you the board count and pattern that holds it.

Why no published weight rating?

Capacity depends entirely on the build, and the build depends on the load. A published number would either undersell what we can build or oversell what a cheap version could actually hold.

— WORTH KNOWING

Q — Can heavy duty be built used?

Reinforcement is almost always specified new, since the board thickness and fastener pattern need to be exact. Ask and we will tell you honestly if a used option would hold your load.

Q — What size can heavy duty be built?

Any size — see custom sized pallets (page 09) if it is not a standard footprint. Reinforcement scales with the drawing.

Q — How fast can you turn around a heavy duty order?

Quotes go out the same working day. Once confirmed, the order is on the floor that week, large runs included.

Sound, sorted and ready to go.

PRODUCT
03 / 10

Second-hand pallets checked for broken boards and loose blocks before they leave the yard, then sorted into grades so you only pay for the condition you actually need. In stock now, sold by the piece or the bulk lot. If a used pallet will do the job we say so, instead of selling you a new one.

In stock — same or next-day collection

— THREE GRADES IN THE YARD

GRADE A

Good grade

Sound structure, only cosmetic wear. Suits in-plant movement and one-way export where it needs to look presentable.

GRADE B

Economy

Our lowest price point. Marked and weathered, but holds together for storage and short trips.

BULK

Mixed bulk lot

Assorted sizes in usable condition, sold by the lot for volume buyers and traders. Cheapest per piece if you collect yourself.

GOOD GRADE

INSPECTED

— HONEST GRADING

Checked before it leaves the yard.

Every used pallet passes three checks before it is priced and shelved.

Boards

Checked for cracks and broken deck boards before grading.

Blocks

Loose or split blocks are repaired or the pallet is dropped a grade.

Fasteners

Proud or missing nails are reset before a pallet is offered for sale.

— WORTH KNOWING

Q — Are used pallets structurally safe?

Everything sold as Good grade or Economy has been checked for broken boards and loose blocks. If a pallet does not pass, it does not go out at that grade.

Q — Can I mix sizes in a bulk lot?

Bulk lots are assorted by nature — mostly 100×120cm with some variation. Tell us if you need a tighter size range and we will check what is available.

Q — Do you collect old pallets too?

Yes — see We Buy Wood & Pallets, page 15, if you have pallets, timber or offcuts to sell rather than buy.

Any size. Any shape you need.

PRODUCT
04 / 10

Most of what leaves this yard is made to order, so a size you cannot find elsewhere is usually still a size we can build. Send a drawing, a photo, a sample pallet, or just the dimensions of your carton — no fixed minimum.

Not on this list? We still build it — no extra charge for a one-off size.

OPTION 01

Send a drawing

A CAD file, a sketch, or a spec sheet from your carton supplier — whatever you already have.

OPTION 02

Send a photo

A photo with a tape measure in shot of the pallet or space you are matching against.

OPTION 03

Send a sample

Drop off the pallet you use now and we will match it board for board.

HELD IN THE YARD RIGHT NOW

Every size we build

80 × 100cm	80 × 120cm	90 × 90cm	90 × 110cm	100 × 100cm	100 × 110cm
100 × 120cm MOST REQUESTED	100 × 130cm	100 × 140cm	105 × 105cm	110 × 110cm	110 × 130cm
115 × 115cm	120 × 100cm	120 × 120cm	120 × 140cm	60 × 80cm HALF PALLET	40 × 60cm QUARTER PALLET

SIZES & SPECIFICATION

We build to the size you give us

Board count, thickness, spacing and base height all change with the job, so we quote against your measurement or sample rather than a fixed spec sheet.

MINIMUM ORDER

None

A single custom pallet is quoted the same way as a full run — there is no fixed minimum quantity.

Spec the grade. We build to it.

PRODUCT
05 / 10

Not every job needs a different size — some need a different wood, finish or treatment. Export certification, food-grade untreated timber, or a sanded and finished surface: tell us what the pallet has to satisfy and we build to that spec, not just a footprint.

Not the same as size — that's page 09. This is about the wood and finish itself.

— THREE SPECS WE BUILD TO OFTEN

EXPORT GRADE

ISPM-15 heat treated

Heat treated and stamped for international shipment, with certification for customs.

FOOD SAFE

Untreated, nothing added

No chemical treatment or paint — built from clean timber for direct food contact work.

FINISHED

Sanded & smoothed

Splinter-free edges and a sanded surface for showroom or customer-facing use. See page 13.

NOT AN EXHAUSTIVE LIST

If your requirement is different, tell us.

Most orders only need one spec — a size or a quality — but some need both, and combining them is fine to raise in a single enquiry. Send the spec sheet or a sample from your current supplier and we will confirm we can match it before quoting.

— WORTH KNOWING

Q — What is the difference between custom size and custom quality?

Size is the footprint and board pattern. Quality is the wood itself — its treatment, certification and finish.

Q — Do you provide ISPM-15 certificates?

Yes, heat-treated stock is stamped and comes with the paperwork customs expects at the destination port.

Q — Does a specific quality cost more?

It depends on the spec — heat treatment and finishing add a step, so we quote it against the exact requirement rather than a flat surcharge.

Washable. Rot-proof. Ready.

PRODUCT
06-07 / 10

Moulded plastic pallets that do not absorb moisture, splinter or need heat treatment for export — hose them down between loads and they go straight back out. Stock colour depends on what is in the yard; all four below are commonly available.

— THREE JOBS WOOD CANNOT DO AS WELL

01 Food & pharma

No splinters, no absorbed odours, and it can be hosed down or steam cleaned between batches.

02 Fast export

Skips ISPM-15 heat-treatment certification entirely, which can save a step at customs.

03 Closed-loop systems

Consistent weight and dimension cycle after cycle, which matters for automated handling and racking.

WOOD OR PLASTIC?

We will tell you honestly which fits.

Plastic is not automatically the better choice — it costs more up front and a damaged unit cannot be repaired the way a wooden board can. If your job is one-way export or heavy point loads, our new wooden pallets (page 06) are usually the cheaper answer. Tell us what the pallet has to do and we will recommend the material, not just sell whichever is in stock.

— USED PLASTIC PALLETS

Inspected. Ready to load.

Plastic does not rot, warp or splinter with age, so a used unit is still genuinely durable — it just costs less. Every pallet is checked for cracks and deck damage and cleaned before it goes back out: **deck & runners** checked for stress fractures, **cleaned & hosed** before leaving the yard, and **size sorted** so what you order is what arrives.

Q — What sizes are available?

Standard moulded sizes including 100×120cm and 110×110cm. Ask about your exact requirement and we will confirm what is available.

Q — Do you sell used plastic pallets too?

Yes, inspected and reconditioned stock at a lower price than new — ask for both prices side by side.

Built to protect what's inside.

PRODUCT
08 / 10

Closed wooden boxes and open export crates built around the exact item going inside — machinery, fragile goods, or a palletised shipment that needs full protection rather than a strap-down load. ISPM-15 heat treated for international shipment on request.

Export ready — ISPM-15 heat-treated and stamped on request

— THREE JOBS WE BUILD FOR MOST

01

Machinery & equipment

Open or closed crates built around an awkward footprint, with internal bracing at the lift points.

02

Fragile & glass goods

Fully enclosed boxes with internal padding, for goods that cannot take a knock in transit.

03

Palletised export shipments

A crate built directly onto one of our pallets so the whole shipment moves as one unit.

— HOW WE QUOTE A CRATE

Send the dimensions of what goes inside.

A drawing, a photo with measurements, or the item itself if you can bring it to the yard. Tell us the weight, how it will be lifted, and whether it needs to be fully enclosed or just braced on a pallet.

Q — Do crates need ISPM-15 too?

Yes, if shipped internationally the same heat-treatment rule applies as pallets, with certification provided.

Q — Is there a weight limit?

No fixed limit — internal bracing and board thickness scale to the weight and how it will be lifted.

Sanded smooth. Ready for your project.

PRODUCT
09 / 10

The same pallet you would use in a warehouse, but sanded smooth and checked for splinters and proud nails so it is safe to handle indoors and out. Built to your project size, not just a stock footprint — tell us what you are building.

Finish: sanded & splinter-free — stain, paint or leave raw

— WHAT PEOPLE BUILD WITH THEM

01

Coffee tables & sofas

Sanded decks stacked or framed into furniture — ready to finish however you like.

02

Garden & balcony furniture

Outdoor benches, planters and lounges built from the same rugged stock, sanded for comfort.

03

Decor & display

Retail displays and event staging — a small run, sanded and delivered on short notice.

SMALL ORDERS WELCOME

One pallet or a hundred.

A single sanded pallet for a weekend project gets the same attention as a bulk order for a furniture workshop. Tell us the size, whether you want it raw or pre-sanded on both faces, and how many, and we will quote it the same working day.

— WORTH KNOWING

Q — Is the wood safe to use indoors?

Yes — ask for untreated, sanded stock and nothing chemical goes near it. See also custom quality pallets (page 10) if you need it certified food-safe or export grade too.

Q — Can you build a non-standard size for a specific piece of furniture?

Yes, send your project dimensions the same way you would for custom sized pallets (page 09) and we will build to match.

Q — Can I choose the wood tone or grain?

Within what the yard has in stock, yes. Tell us the look you are after and we will pick boards to suit.

Chip shaped, loose in sacks.

PRODUCT
10 / 10

Clean, dry chips off our own saws — not pressed, not blocked, just loose shavings filled straight into sacks. Sack weight runs roughly 11 to 14 kg depending on how coarse the batch is. Running since October 2025.

Same-day quote turnaround on sack quantity

— HOW IT SHIPS

BY THE SACK

Loose fill

Roughly 11 to 14kg each. Take ten or take a truckload.

STANDING ORDER

Fixed schedule

Stables and workshops mostly take a fixed count on the same day each week or fortnight.

WITH PALLETS

Cheapest way to buy

Put the sacks on the same delivery as your pallet order.

— COMMONLY USED FOR

One material, several jobs — how coarse a batch runs decides what it suits best.

Stable & animal bedding

Soft, absorbent chip fill for stalls and pens.

Packing & void fill

Loose cushioning around goods in transit.

Workshop & spill absorbent

Soaks up oil and spills on a shop floor.

Mulch & ground cover

Coarse chip spread for beds and walkways.

— WORTH KNOWING

Q — Are they pressed or blocked?

No. These are loose chips filled straight into sacks — nothing is compressed into a bale or block.

Q — Where do the shavings come from?

Off our own saws, from the wood we cut for pallets. Nothing painted or chemically finished goes into the line.

Q — How should sacks be stored?

Under cover and off the ground. Kept dry they last months; left out in the open the chips pick up humidity within a week or two.

Q — Can I set up a standing order?

Yes, and most regular buyers do. Tell us the sack count and the day, and it goes on the round.

— THE BUY-BACK PROGRAMME

Selling wood or pallets? Start here.

CASH
IN HAND

Cash in hand, paid on the spot — for used wooden pallets, new or used timber, offcuts and used sticks. Most suppliers only sell; we also buy, which closes the loop for anyone clearing a yard or warehouse.

— FOUR THINGS WE TAKE OFF YOUR HANDS

01

Used wooden pallets

Any grade, any quantity — from a handful in a corner to a full warehouse clearance.

02

New & used timber

Leftover stock, site offcuts, or timber sourced for a job that changed.

03

Used wood & sticks

Reclaimed boards, dismantled pallets, packing sticks — loose lots included.

04

Offcuts & dunnage

Industrial dunnage and packing waste that would otherwise go to landfill.

— THREE STEPS, PAID THE SAME DAY

01

Tell us what you have

Call, email or WhatsApp a photo and a rough quantity.

02

We quote a price

Same working day, based on condition and volume.

03

Cash on pickup

Paid on the spot when we collect.

COLLECTION, NOT JUST A QUOTE

We load it ourselves.

Our own transport, strapping and all — larger lots are usually collected the same day the price is agreed, paid on the spot before the truck leaves.

— WORTH KNOWING

Q — Is there a minimum quantity?

No fixed minimum, though pricing per piece improves with volume. A single pallet or a full truckload are both worth a call.

Q — How is the price decided?

Condition, wood type and volume. A photo is usually enough for a rough number; a site visit confirms it for larger lots.

Q — What areas do you collect from?

All seven emirates, same as our delivery network.

Ten sectors, one yard.

— WHAT CUSTOMERS SAY

From the order desk

★★★★★

“We changed carton size and needed a new deck in a week. Al Madhi built a sample, we approved it on the Sunday and four hundred arrived on the Wednesday.”

Warehouse manager — food distribution,
Dubai Investment Park

★★★★★

“They told us the light duty pallet would do the job and saved us money on two thousand units. That is not what a trader would have said.”

Procurement lead — packaging
manufacturer, Sharjah

★★★★★

“We take shavings every fortnight for twenty-two boxes. Dry, no dust, no smell — and the truck turns up when they say it will.”

Yard manager — equestrian centre, Al Awir

Not sure your industry fits?

If it moves on a pallet, we have almost certainly built for it. Call 050 597 4922 and describe the load — we will tell you honestly what suits it.

— DELIVERY COVERAGE

Delivery is charged on distance and load size. Collection from the Al Sajaa yard is cheaper if you have your own transport.

Sharjah & Ajman	Same or next day
Dubai & Umm Al Quwain	Next day
Ras Al Khaimah & Fujairah	1–2 days
Abu Dhabi & Al Ain	1-2 days, by load size

Opening hours

Monday–Saturday, 06:00–18:00 · Sunday closed
Enquiries before 18:00 on a working day are priced the same day.

The works — get directions.

Al Sajaa Industrial Area, Sharjah, UAE — roughly twenty minutes from Sharjah city, off the Emirates Road interchange.

— BEFORE YOU ORDER

Common questions

Q — What pallet sizes can you make?

Whatever size you need. The most common size shipped is 100×120cm, and odd sizes are built to your measurements.

Q — How much weight will a pallet hold?

It depends entirely on the build. Tell us the weight and what it is carrying and we will spec the boards and base to suit.

Q — Do you deliver outside the UAE?

Our own fleet covers all seven emirates. For cross-border shipments, we can build export-grade crating (page 12) for you to forward on.

Q — How soon can you deliver?

Standard sizes held in stock are usually ready the same or next day. Custom orders get a completion date with the quote.

Q — Is there a minimum order?

There is no fixed minimum. Small orders are accepted, and the price per pallet or per sack improves with larger quantities.

Q — Can I collect instead of paying for delivery?

Yes — collection from the Al Sajaa yard is available any opening day and costs less than delivery.

Ready to get a delivery estimate?

Send your emirate and load size to 050 597 4922 or almadhicarpentry@yahoo.com and we will confirm timing with your quote.

— GET IN TOUCH

Send your size, and we'll quote it the same working day.

Call, WhatsApp or email — whichever is quickest for you. Enquiries received before 18:00 on a working day are priced the same day, and stock sizes usually ship the next.
